

Placement Cell AI-Use Policy

College Placement Cell | Effective: 2026 | Version 1.0

Student-AI Scenario Risk Classification (EU AI Act Tiers)

#	Scenario	Tier	Reasoning
1	AI résumé editing	Limited	Allowed with recruiter disclosure; student substance is theirs, polish shared.
2	AI mock interviews	Minimal	Free use. Practice tool; no recruiter is harmed.
3	AI-written application essays	High-Risk	Allowed with mentor review + signed student declaration; assessed on student voice.
4	AI-coded GitHub portfolio	High-Risk	Allowed with mandatory oral defence; student must walk through every accepted line.
5	AI in graded assignments	Context*	Unacceptable for ability-testing; Limited (with declaration) for application-testing.
6	AI-generated CGPA on résumé	Unacceptable	Falsification of academic record. Banned outright.
7	AI-cloned voice for video interview	Unacceptable	Identity fabrication. Banned outright.
8	AI for skills self-assessment	Minimal	Free use. Self-reflection tool; no external party is misled.

* Scenario 5 tier depends on assignment type — see Permitted/Prohibited sections.

Permitted Uses

1. Rewrite résumé bullets for clarity and grammar (*disclosure to recruiters required*).
2. Simulate mock interviews for personal practice and answer refinement.
3. Explain technical concepts (DSA, OS, DBMS) in study mode.
4. Generate placement-prep study schedules from a given syllabus.
5. Produce one-page company-prep briefs, verified against the company's official website.
6. Review and suggest improvements to student-written code, with oral defence of every accepted change.

Prohibited Uses

1. AI may NOT be used to fabricate projects, internships, or experience the student did not complete.
Detection: Mentor oral defence — student explains technical decisions and walks through code on résumé.
2. AI may NOT be used to clone the student's voice for asynchronous or pre-recorded video interviews.
Detection: Cross-check with recruiter; flag submissions lacking a live segment.
3. AI may NOT be used to generate or alter academic records (CGPA, marks, transcripts) shared with recruiters.
Detection: Cross-reference all CGPA/marks with the college academic portal before submission.
4. AI may NOT be used to write essays where the student's voice is the assessment criterion (SOP, motivation letters).
Detection: Mentor reviews 2-3 prior writing samples and compares voice consistency before clearing submission.

Enforcement

The placement cell will conduct random oral defences on portfolio projects (20% sample of placed students per cycle). Violations of Prohibited Uses result in: **first offence** — written warning and portfolio re-defence within 7 days; **second offence** — placement support withdrawn for the current recruitment cycle. The placement cell acknowledges that not all AI use is detectable; this policy relies in part on student integrity and on the professional consequences students face if misrepresentation is discovered by recruiters.
